

Dear Legislator,

I am in strong support of SB4 and would hope that the need for energy independence from fossil fuels from environmental and geopolitical perspectives would be compelling. I am, however, disappointed that you continue to support crony capitalism in the way that Tesla is blocked from directly selling their cars. Car dealer franchises do not merit special protection. Can't we evidence that we are a forward thinking state that supports oil independence, free enterprise and the benefits of competition? This has to stop.

Best,

Peter Holland
